The SMILE Digital Escape Rooms offer an engaging, challenge-based learning resource designed to make sustainability education more memorable and impactful for students. By solving quizzes and riddles, students reflect on daily lifestyle choices, fostering critical thinking, problem-solving, creativity, and collaboration skills while gaining structured knowledge about climate change and sustainable mobility. These escape rooms cater to various skill levels, from primary to secondary education, with progressive difficulty levels.

Result 3: Educational Resources for Students & Piloting

Educational resources, digital escape rooms and animation videos in the topics of climate change education and sustainable mobility.

Resource

Complementing the escape rooms, the SMILE Animation Video Series includes six brief, informational videos (1–2 minutes each) that can be used independently or integrated with the escape rooms. The videos aim to raise climate awareness and promote behavior changes that contribute to reducing greenhouse gas emissions, focusing on topics such as sustainable mobility, the environmental impact of transportation, and the role of younger generations in combating climate change.
